Sakshi Jadhav

Full Stack Developer

+91-8767552325 sakshi2020jadhav@gmail.com sakshjadhav Sakshij2810 Portfolio

Summary

Dynamic and proactive Full Stack Developer eager to leverage strong technical skills and innovative solutions. Committed to contributing to a collaborative team and delivering impactful results.

Skills

Programming: TypeScript, JavaScript, Java, Python, Data Structures & Algorithms (DSA)
Frontend Development: HTML, CSS, React.js, Redux, Redux Toolkit, Redux Thunk, React Router v6, React Hooks, Context API, Material UI (MUI), Tailwind CSS, Formik + Yup
Backend Development: Node.js, Express.js, JWT, OAuth, MongoDB, SQL, EJS, RESTful APIs, Middlewares
Tools & DevOps: Git & GitHub, Docker, CI/CD, Kubernetes, Jira, Agile Methodologies, Odoo, Webflow, WordPress, Replit

Experience

Full Stack Developer **Jul 2024 – Current**
Addcomposites oy (Full Time - Remote) ***GitHub Link — Project Links***

- Developed **30+** enterprise modules (Leads, CRM, Payments, Bookings, Automation, Campaigns, RBAC) for a full-scale ERP used across multi-tenant businesses.
- Integrated real-time WhatsApp communication using **Socket.IO & WhatsApp Business API**, delivering live message updates, 2-way chat sync, template management, & message-status analytics for **1000+** conversations.
- Enhanced Lead Management with advanced search (**10+** filters), status workflows, bulk operations, activity history, WhatsApp actions, & conversion pipelines—improving lead handling efficiency across the product.
- Engineered **100+reusable components, 25+ custom hooks, 35+ utilities, helpers & 40+ Redux reducers**, ensuring scalable architecture, reduced code duplication, & optimized rendering across the app.
- Improved overall application performance using **code splitting, memoization, debounced inputs, & optimized state management**, resulting in smoother UX & reduced unnecessary re-renders for high-data modules.
- Implemented an internal team chat system by integrating **Google Chat API with Google OAuth 2.0**, enabling secure login and seamless real-time communication workflows.
- **Technologies Used:** Typescript, React.JS, Node.JS, Express.JS, SQL, Socket.IO, Google OAuth 2.0, Google Chat API

Web Developer **Apr 2024 – Jul 2024**
Wisteria (Intern - remote) ***Project Links***

- Boosted user traffic by **80%** through optimized website design and improved user engagement.
- Reduced **100+** invalid user records, enhancing shipping efficiency by implementing form validation logic
- Automated delivery date calculation by integrating Shiprocket, Increased customer acquisition by automating WhatsApp/email marketing.
- **Technologies Used:** Javascript, HTML, CSS, Odoo, OAuth, Facebook Developer Tools , Lazy loading, Code splitting

Full Stack Developer **Aug 2023 – Mar 2024**
UpGrad (Trainee - remote) ***Project Links***

- Gained **9+** months of hands-on training in MERN stack, Agile methodology, Jira.
- ECOMMERCE: Authentication, Admin Dashboard, Payment Processing & Order Tracking, Product Filtering, Searching, & Pagination
- StackOverflow Clone: Developed a StackOverflow-like project that automated **80%** of the workflow.
- **Technologies Used:** razorpay, bcryptjs, MERN Stack, jsonwebtoken, Chart.js, Axios, Git & GitHub, memoization

Awards & Certifications

- **Sigma 8.0 (Dev + DSA) – Apna College (2025)**
- **C Programming: Become A Pro! Think Like a Programmer! – Udemy (2024)**
- **Full Stack Development Bootcamp – UpGrad (2023)**

Education

BTech in Computer Science **Graduated: 2021 - 2025**
Dr. Babasaheb Ambedkar Technological University, Beed, Maharashtra *CGPA: 7 / 10*
